CORE COMPETENCIES

- Full Stack Development
- MERN Stack
- REST API Design
- JWT Authentication
- Role-Based Access Control
- Database Design & ERD
- Responsive UI Design
- Deployment & Hosting
- Version Control (Git)

LANGUAGES

- English
- Urdu

CURRENTLY LEARNING

- Next.js App Router, Server Components & Server Actions
- Auth.js & Advanced Authentication Patterns
- AI Integration in Web Applications
- Stripe Payment Integration

PROFESSIONAL SUMMARY

Passionate Full Stack MERN Developer currently pursuing BSIT at Government College University Faisalabad. Experienced in designing complete systems from database modeling and backend architecture to frontend development, authentication, deployment, and maintenance. Skilled in building scalable backends with Node.js, Express.js, and MongoDB, and modern frontends with React.js, Tailwind CSS, and Bootstrap. Strong understanding of REST APIs, role-based access control, JWT Authentication.

TECHNICAL SKILLS

Frontend: React.js, HTML5, CSS3, JavaScript (ES6+), Bootstrap, Tailwind CSS, React Router, Axios

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Middleware, Role-Based Authorization

Database: MongoDB, Mongoose

Tools: Git, GitHub, Postman, MongoDB Atlas, Vercel, VS Code

Languages: JavaScript, C++

PROJECTS

Office System - SaaS Platform

Technologies: Node.js, Express.js, MongoDB, Mongoose, JWT, bcrypt | [Live Demo](#)

A full-stack SaaS-based office and restaurant management platform designed to streamline organizational operations through role-based access control. The system provides centralized management of employees, office staff, and administrative workflows. Key features include JWT authentication, multi-role user management, secure password hashing with bcrypt, and a RESTful API architecture powering a dashboard-based workflow. Solely responsible for the entire backend including MongoDB schema design, REST API development, and authentication & authorization implementation.

Real Estate Website

Technologies: React.js, Node.js, Express.js, MongoDB, Tailwind CSS | [Live Demo](#)

A complete full-stack real estate platform enabling users to browse, search, filter, and explore property listings with detailed property pages and integrated contact options for buyers. Built end-to-end — from database design and backend API development to React frontend and production deployment on Vercel. Features an advanced search & filtering system, responsive UI with Tailwind CSS, and a clean modern interface optimized for both desktop and mobile users.

Inventory & Sales Management System

Technologies: React.js, Node.js, Express.js, MongoDB, Tailwind CSS | [Live Demo](#)

A full-stack inventory and sales management system that allows users to manage products, inventory, and sales records through a dashboard. It includes full CRUD functionality for products and stock management, basic sales tracking, and filtering features for data views. The frontend is built with React using a responsive UI, while the backend is developed with Node.js and Express, and MongoDB is used for data storage.

Other Projects

- TaskFlow Client Application - Task & workflow management app (React.js, Node.js, MongoDB, Tailwind CSS)
- Job Posting & Hiring Portal - Role-based dashboards with full authentication system

EDUCATION

Bachelor of Information Technology (BSIT)

Government College University Faisalabad (GCUF)

2024 — Expected Graduation: 2028

Relevant Coursework: Database Management Systems, Object Oriented Programming, Software Engineering, Web Engineering

Intermediate in Pre-Medical

Punjab College, Hafizabad

2022 — 2024 | 84%
